*This item of expense is comprised of two main components both chargeable to the employer which include group term life insurance (GTLI) and a regular pension contribution calculated by applying a percentage to salaries paid. This percentage varies according to the employee's membership tier.*

*For the current school year, the district's bill for pension contributions was \$43,663. For the past several years the district, like most districts across the State, has been able to fund the contribution portion of the billing via credits earned under a previous State funding formula. After this year, the district will have a total credit balance carryover of \$106,896 which is correctly reflected on the district's books as a prepaid expense.*

*For the current school year, the district's total bill for GTLI was \$13,827. The GTLI portion of the billing is not eligible to be offset by credits. The budgeted amount in the administrative component is the estimated pro-rated share of the total bill that is applicable to this component*

*For the 1999-2000 school year, the district changed from a conventional premium program to a retention premium program. This change was being made with the intention of saving premium costs over an extended period of time.*

*Shared health insurance savings represent a benefit paid to employees who opt not to participate in the district's health insurance program. In addition, a portion of this cost represents the "grandfathering" of participants in the district's once mandatory insurance buyout program.*
