Mental Addition and Subtraction

Dear Family,

This week your child is learning to count by fives, tens, and hundreds. They are also learning to add and subtract 10 or 100 mentally.

Your child will count forward and backward by fives and tens. For example:

Count forward by fives: 105, 110, 115, 120, 125, 130

Count backward by fives: 180, 175, 170, 165, 160, 155

Count forward by tens: 270, 280, 290, 300, 310, 320

Count forward by hundreds: 135, 235, 335, 435, 535, 635

Your child also will add 10 and 100 to a three-digit number and subtract 10 and 100 from a three-digit number. For example:

$$534 - 100 = ? \quad 819 + 100 = ? \quad 682 - 10 = ? \quad 265 + 10 = ?$$

As your child solves these different types of problems, they will identify number patterns. For example, they will see that the hundreds digit, or first digit of a three-digit number, will go up or down by 1 when 100 is added or subtracted.

$$534 - 100 = 434$$

$$819 + 100 = 919$$

Your child will see that the tens digit, or middle digit of a three-digit number, will go up or down by 1 when 10 is added or subtracted.

$$682 - 10 = 672$$

$$265 + 10 = 275$$

Invite your child to share what they know about adding and subtracting 10 and 100 by doing the following activity together.

Learning Games

Base-Ten

ACTIVITY ADDING AND SUBTRACTING 10 AND 100

Do this activity with your child to practice mental addition and subtraction.

Materials pencil and paper, scissors (optional), index cards (optional)

- Help your child to make word problem cards, by cutting out the prompts below or writing the prompts on index cards.
- Ask your child to write a three-digit number between 100 and 900 and choose one category card and one addition or subtraction card.
- Then help your child to write a word problem using the number, the category card, and the addition or subtraction card. For example, if your child chooses *Flowers* and *Subtract 10*, they might say: *382 flowers are growing in the garden. I picked 10 of them. How many flowers are in the garden now?*
- Ask your child to solve the word problem.
- With your child, write and solve word problems with the remaining cards. They should write a different three-digit number for each word problem.
- Ask your child: *What patterns do you notice when you add and subtract 10? When you add and subtract 100?*

Animals	Add 10
Fruits	Subtract 10
Toys	Add 100
Flowers	Subtract 100
