CELEBRATE DECEMBER'S NATIONAL DAYS:

Today - On December 6th, National Microwave Oven Day honors one appliance that changed how we use the kitchen.

Quite by accident, self-taught American engineer Percy Spencer discovered a way to heat food safely with microwaves. While working with an active radar in 1945, he noticed a melting chocolate bar in his pocket. The high-powered microwave beams created a heating effect ideal for cooking. Spencer deliberately attempted cooking popcorn with the microwaves. Next, he tried cooking an egg. Both the popcorn and the egg created dramatic results. However, the popcorn resulted in success, unlike the egg. The egg exploded in his fellow engineer's face! However, we can cook eggs in microwave ovens.

Tomorrow : Each year in the United States, National Pearl Harbor Remembrance Day honors all those who lost their lives when Japan attacked Pearl Harbor on December 7, 1941. More than 3,500 Americans lost their lives or were wounded on that solemn day.

The day marked a turn in the United States' position regarding involvement in World War II. The Japanese attack damaged several battleships, permanently sinking both the USS Arizona and USS Oklahoma. Still, others capsized, taking crew members with them. One noted ship was the USS Utah. Along with naval vessels, the attack destroyed aircraft, too. As a result, the attack forced the U.S. into a war that had been raging for two years. Until December 7, 1941, The United States had practice isolationism with regards to the war. The country had no interest in

joining the war with the exception of providing some resources for those Allied countries already battling the war. When Japan attacked Pearl Harbor, though, The United States had no option but to join the fray.

The day is also sometimes referred to as Pearl Harbor Remembrance Day or Pearl Harbor Day.

Thank you.

Remember...WE ARE WAPPINGERS !!
