November 20, 2023

Dear Parent/Guardian:

New York State Education Law requires that BMI (Body Mass Index) and weight status groups are included as part of a student’s school health examination. Our school was randomly selected by the New York State Department of Health to take part in a survey. Being selected requires our District to report to the New York State Department of Health information about our students’ weight status groups. The purpose of sending this information to the New York State Department of Health is to help health officials develop programs that support children's health and well being.

As part of the required school health survey, the nursing department will gather all relevant information from your child's health record as provided by you i.e., physical from primary physician. These numbers i.e., weight and height, are used to figure out the student’s BMI or body mass index. The BMI helps the doctor or nurse know if the student’s weight is in a healthy range or is too high or too low. *Personally identifiable information will not be shared with the New York State Department of Health, only a summary of the information collected.* However, parents may choose to have their child’s information excluded from this survey report.

**The survey will only be conducted for students in grades 1, 2, 4, 6, 8, 10, and 12.**

If you do not wish to have your child’s weight status group information included as part of the NYS Health Department’s survey this year, please sign your name below and return this form to your school Health Office by Friday, December 15, 2023.

Sincerely,

Richard Zipp  
Asst. Superintendent Student Support Services & Accessible Education

.....

Please do not include my child’s weight status information in the **2023-2024** New York State Health Department Survey collecting summary information about students’ weight and height.
