

## Facilities and Operations

Below is the current status of our capital projects. This has been an extremely busy summer and the work will continue through the next several months. Also the Energy Performance Project will begin in the near future. In 2020 and 2021 we will be starting the major renovation of the entire heating systems at Roy C. Ketcham and John Jay High Schools. This will be a very difficult task as we will be working in every classroom at both high schools.

### Projects completed and projects to be completed in the years of 2018 & 2019
