

How to Help Your Child Succeed in School

Google Classroom

February 22, 2017 5-6pm

Van Wyck Room 215

Thought Google was just a search engine?

It's that and so much more!

All students in the WCSD have a Google account, which allows them to store and access files whenever they have access to the Internet.

Work that students start at school can be opened up and worked on at home without having to use a flash drive or email documents to themselves.

Google Classroom is a management device used by teachers to assign work, usually through a Google doc (document).

With Google Classroom, students can find all of their classes in one place!

Come to the workshop to learn the following:

- How students access Google Classroom
- What teachers assign and share through Google Classroom
- How teachers can check on student progress through Google Classroom
- How work is revised, saved, submitted, and graded in Google Classroom
- How students can create, share, and collaborate using Google Drive

Please RSVP through the following link so we have the appropriate space <https://goo.gl/forms/oxbPX5qvEA0O9SN82>

Workshop will be presented by Ms. Furnia and Mr. May
