<b>Vassar Road Elementary</b>	Security Vestibule Replacement of Damaged Sidewalks	Smart Bond Project Replacement of defective sidewalks
<b>Wappingers Junior High</b>	Elevator	26 Million Dollar Project

**Energy Performance Project**

The plans and specs have been sent to the NYS Education Department. We are expecting approval in 6-8 weeks. If this holds true, we will begin construction sometime in October. Construction will be 2<sup>nd</sup> shift.

**Facilities and Operations**

The Facilities Department has been keeping ahead of the construction by removing ceilings, making adjustments to heating systems, etc. There have been several projects that we have taken out of the contractor scope of work to save money. This allows the District to add additional work to the projects without additional cost.

**John Jay stage rigging**

**Removal of the old wood platform at John Jay**

**New duct work installation at JJ auditorium**

**New green rooms at John Jay**

Evans asbestos abatement is now complete

Demolition of Evans art and faculty rooms

Fishkill's security vestibules

John Jay new sound-proof practice booths

**Sheafe Road's new security vestibule entrance    Gayhead's defective sidewalk replacement**

**Fishkill Plains new roof**

**Gayhead's new elevator**

**Out with the old, in with the new windows at Brinckerhoff**

**The floors in the tower at Fishkill Elementary shine thanks to our custodial staff**
