

Math Problem of the Week
#2
Due Friday, October 15, 2010

Hello Animal Explorers,

Africa has many species of animals. One such species is the black rhino which you will now observe. The black rhino has 1 big horn and 1 smaller horn. Rhino's tend to stay by themselves, but at times they will get together in small groups.

1. It is the rainy season in Africa, at a nearby watering hole you see 24 horns. How many rhinos are at the watering hole? 🐾

_____.

2. As you follow the rhino's from the watering hole to a pasture with lots of plants you ask yourself what else do they eat? The best way to find out is to look at their dung (yuck). When the group of rhinos leave you go to look at a pile. You see the remains of 2 bulbs, 12 tree leaves, and 3 grasses. How many different types of plants did it eat? 🐾

_____.

Safari Lottery #2

Circle either the rhinoceros or the African continent.

Whichever is picked the LEAST will win 🐾 .

First and Last Name _____

Room _____
