**Materials** - Students need to have at least a working scientific calculator with them every day in class. Graphing calculators will be used often in this course and will be provided for classroom use only. If you are interested in purchasing your own graphing calculator (which I highly suggest) I recommend the TI-84 Plus CE as it is the most user friendly. There are also graphing calculator applications available for smartphones. I recommend Calculate84 which is a free app available for most devices.

All students are required to have some sort of notebook to hold their math notes and handouts.

**Assignments** – There will be an assignment almost every day which will be posted on Google Classroom. All assignments will be due by 7am the following class day and will be worth 2 points based on effort. *Late assignments can be made up for 1 point only if all work is shown.*

**Graded Assignments** – Graded Assignments will occasionally be assigned and posted on Google Classroom. These assignments can be worth up to 45 points. *Graded assignments will be accepted late, however, several points will be deducted for each day it is past due.*

**Quizzes/Tests** - Quizzes will be worth anywhere from 5 to 45 points each. Quizzes can be expected at least once a week. There *may* be an exam every two or three weeks. These exams will be announced in advance. If there is an absence on the day of a quiz or test the students are expected to take the exam on the day that they return to school. Tests typically range from 45 to 100 points.

**Midterm/Final Exams** - Should the decision be made that there will be a midterm students will be notified well in advance of the date for them to adequately prepare for that exam. The final exam will be the Algebra 2 Common Core Regents in June.

**Computing Averages** - A student can determine their average at any time by adding the points they have earned and dividing by the total number of points which they could have earned. Students can also check their average on Google Classroom.

**Extra Help** - I am available for extra help during the school day, specifically periods 1, 5 & 8. If a student needs to stay after school for extra help, they may ask for available times. Students should feel free to stop by whenever they have any questions.
